

HUYNH CONG Y

Ho Chi Minh City, Vietnam | [0766 923 478](tel:0766923478) | huynhcongy2004@gmail.com | [GitHub](#)

PROFILE

Final-year Software Engineering student with hands-on experience building, testing, and deploying full-stack web applications across Java/Spring Boot and TypeScript/React stacks. Comfortable translating requirements into APIs, data models, responsive interfaces, automated tests, and CI/CD workflows. Strong foundation in OOP, REST APIs, SQL, Git, debugging, and software quality.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Software Engineering | GPA: 3.18/4.00

Ho Chi Minh City, Vietnam

Expected Graduation: Dec 2026

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, SQL

Backend & APIs: Spring Boot, Fastify, REST APIs, Spring Data JPA, Prisma

Frontend: React, Next.js, HTML5, CSS3, Vite, Responsive Web Design

Data & Infrastructure: PostgreSQL, Redis, Docker, GitHub Actions

Testing & Tools: JUnit 5, Mockito, MockMvc, Vitest, React Testing Library, Postman, Git, Maven

Foundations: OOP, Data Structures & Algorithms, Data Modeling, Debugging & Refactoring, Software Testing

PROJECTS

GreyTest - AI-assisted QA Platform | *Capstone Project, In Progress*

Java, Spring Boot, React, TypeScript, PostgreSQL, JUnit 5, Mockito, Vitest | [Frontend](#) | [Backend](#)

- Developing a full-stack QA platform for analyzing Java/Spring Boot projects and supporting business-rule, test-plan, test-case, and coverage workflows.
- Built automated API/service, integration, and UI tests covering validation, authorization, background jobs, PostgreSQL persistence, and component interactions using JUnit 5, Mockito/MockMvc, Vitest, and React Testing Library.

Short Link - Full-Stack URL Shortener & Analytics Platform | *Personal Project*

TypeScript, Fastify, Prisma, PostgreSQL, Redis, Next.js, Docker | [GitHub](#) | [Live Demo](#)

- Designed the data model and REST API flows for link creation, updates, redirects, status/expiry handling, and click analytics in a deployed full-stack application.
- Optimized the read-heavy redirect path with a 10-minute Redis cache, explicit invalidation and rate limiting; added automated tests, health/readiness checks, GitHub Actions CI, and Docker builds.

Gather & Graze - Bilingual Recipe & Meal Planner | *Solo Project*

React, JavaScript, CSS, Vite, GitHub Actions, Vercel | [GitHub](#) | [Live Demo](#) | [Figma](#)

- Built a responsive English/Vietnamese recipe discovery and weekly meal-planning experience with accent-insensitive search, filtering, favorites, persistent state, and add/replace/remove/undo planning flows.
- Added automated tests for bilingual data, search/filter/sort, and planner behavior, with GitHub Actions test/lint/build checks and accessibility-focused interaction patterns.

CERTIFICATION & LANGUAGES

Gemini Certified Student - University | Google for Education | Dec 2025 - Dec 2028

Languages: Vietnamese (Native); English (Basic working proficiency - technical reading and basic written communication)
